I build where the physical and digital overlap, from hand-tracked visualisations in Unity to immersive installations, with a focus on how people move, touch, experience and sense.

Experience

UX Designer & Design Technologist, own projects and commissions, 2024–present
Stockholm

- **Sphere of Touch (2026):** designed and built a real-time installation for live bodywork. Pipeline: iPad camera → OBS → Spout → Unity, real-time hand tracking extended from one to two simultaneous hands, and a VFX Graph particle system shown on floor screens via an HDMI splitter and 2×2 video wall controller. Premiered at Helix Art Space, June 2026. Currently developing an iteration based on sound, using stone recordings from Reykjavík.
- **ASS2ROID rover (2026):** co-designed and built a mobile rover bar on a garden cart chassis with a functional control panel (keyboards, joystick, buttons, screen), lighting and power, used by visitors at The Borderland festival. Created with Adrian Petersen.
- **Dome Lab, Tekniska museet/Wisdome (2026):** one of 15 selected creatives; built a QR-triggered web experience that the dome audience played on their own phones, shown at Dome Dreaming, May 2026.
- **GHOSTED (in progress):** an installation combining a 3×2 m plywood wall with laser-cut acrylic and AR content via image tracking (Unity, AR Foundation); built an interactive web prototype to test the experience.

Co-founder & Creative Director, 2026–present
Body of Work, platform for haptic and somatic art: bodyofwork.se

- Co-founded the platform with Jakob Skote (Untold Garden) and co-produced its first event at Helix Art Space: part workshop, part exhibition, part lab.
- Built the brand, website, newsletter and livestreams of workshops and talks.

Museum Educator, Guide & Assistant Curator, 2017–2026
Moderna Museet, Uppsala konstmuseum, Museum Andetag, Liljevalchs, Ljungbergmuseet, SUPERMARKET Art Fair

- Nearly ten years of observing how visitors move, look and interact in physical spaces, and adapting programmes to children, young people and adults.
- Developed own formats, including public art walks during the pandemic, and coordinated events, exhibitions and workshops.

Lecturer & Course Lead, Cultural Entrepreneurship, 2022–2025
Uppsala University

- Taught project management, cultural economics and marketing to 100+ students, and managed course budgets, scheduling and examination.
- Set up student projects with Region Uppsala, Uppsala Konsert & Kongress and Konstfrämjandet.
- Research assistant and guest lecturer (*Sustainable Urban Futures*, *Visualizing Cultural Heritage*).

Executive Assistant & Project Coordinator/Project Manager, 2022–2023
Totem Technologies (2022–2023), House Blivande (2023)

- Built internal processes and documentation for a digital startup, working across Swedish and US teams; produced conferences and events at House Blivande.

Education

Winter School: Unfolding Data through Art,
The Icelandic Centre for Digital Humanities and Arts, 2026.
A four-day winter school on artistic and digital humanities research methods and curation for digital data 27–30 October in Reykjavík, Iceland. One of c. 20 participants selected from 60 applicants. Sensor-based interfaces and AI at the Intelligent Instruments Lab; recorded and curated sound datasets at the Iceland University of the Arts; preservation of time-based media art at the National Gallery of Iceland.

Independent courses, Stockholm University of the Arts (Uniarts), 2026.
Dramatic Storytelling in VR; Workshop as Format and Artistic Method

UX Upskill, Hyper Island, 2025–2026.
User research, prototyping, UX/UI and digital ethics.
Cases: UX research and prototype testing for Svenska Kryssarklubben; onboarding redesign and Figma design system for GYST

MA, Digital Art History, Uppsala University, 2019–2021.
Advanced architectural theory; Contemporary visual culture; Digital visualisation in Unity; GIS

BA, Aesthetics & Art History, Uppsala University, 2015–2019
Theoretical philosophy; Cultural entrepreneurship

Dipl. Medical Massage Therapist, Axelsons, 2024.
Practical education, including studies in anatomy and ergonomics. Specialisation in fascial release.

Dance training, contemporary and classical, NECD & Iwanson International, 2013–2015

Skills

- **Prototyping:** Unity, VFX Graph, AR Foundation, real-time hand tracking, Spline, HTML/CSS/JavaScript, Blender
- **Physical:** construction in wood and acrylic, AV setups (cameras, screens, video walls), installation in public spaces, stage and video performance
- **Design:** user research, usability testing, Figma, ProtoPie, design systems
- **Workflow:** AI-assisted prototyping (Claude Code, Lovable, Omma.ai, ElevenLabs, Midjourney), Git/GitHub, workshop facilitation
- **Languages:** Swedish (native), English (fluent)
